### **Course Description:**

Finally, a **practical** class that **enables** you to produce your own illustrated book from the beginning to the delivery of the final PDF files of the publication to the printer.

This class is **aimed at writers** & people who have **little drawing experience**—and have a book project in mind.

Here are some of the subjects addressed:

- Making line drawings the easy way: Simple/fast line drawing techniques (e.g. Drawing from laser prints)
- How to shoot/edit Digital Photographs for books
- Typography for your book—optimal text for reading

Sessions discuss materials, tools & the processes needed for home publishing & important cost/profit considerations.

- This is a **relaxed, noncompetitive class** in which you move at your own pace depending upon your skill level.

After completing this course, a you should have the know-how to produce your own book.

Book used for class:  
**Illustrate Your Self-Published Book**  
\$29.95
