5 classes (15hrs) \$100
4 classes (12hrs) \$80
3 classes (9hrs) \$60

Indian Corn - Denise Mattos

Course Description:

- This is the **only** Scientific & Medical Illustration course in the Pacific Northwest
- This is a **practical introduction to the traditional** techniques that are used in creating illustrations that can be reproduced for use in learning materials such as handouts, booklets, workbooks and exhibits.
- This is a **relaxed, noncompetitive class** in which you move at your own pace depending upon your skill level. For many people this is their first experience in scientific art.
- We will focus on basic pen & ink technique and the use of pens with flexible nibs — You'll also learn the new **PhotoLift®** method of ink drawing on B&W photos.
- It is helpful to have some experience in sketching with a pencil.

The ERDC Studio has floor to ceiling glass walls & a large skylight — offering the best bright north light for doing color illustration. The medical workshops here provide the only professional training in medical illustration in the Pacific Northwest.

We will do some dissection if there is interest

Instructor:

Marko Mikulich

BS, Biological Science, Colorado State University
MS, Instructional Technology, Utah State Univ.

CMI, Certified Medical Illustrator/Photographer,
• University of California, San Francisco, Medical Cntr.
